

## Watson Farms

Watson Farms is pleased to announce that we are adding a lost and found pets data base for all home owners to join. What do you need to do? Simply fill out the form for each pet with a scanned picture and email it to [cmzgr@yahoo.com](mailto:cmzgr@yahoo.com). If you have no way of scanning a picture you can call Chris Ranger (317)746-0909 and she will make arrangements to meet so you can turn in your form and picture. Any picture that is given and not scanned will be returned.

All information will be kept confidential

If anyone finds a pet you can contact Chis Ranger by phone (317-746-0909) or email and she will look through the data base for the owners information and contact them. If the pet is hurt you can give authorization on the form to let us know that you give permission to contact your vet and bring them there if at anytime we are unable to reach you.

If you have any questions please feel free to reach out by email or telephone

**Important information:** If your pet is ever lost, please remember to make a report immediately on Indy Lost pets <https://indylostpetalert.com>, & Paw boost at <https://www.pawboost.com>,
